TECHNICAL SKILLS

Programming
Python · JavaScript · C++ · PHP

Web & Apps
FastAPI · React · Electron · Next.js · Tailwind CSS · Laravel

Data
MySQL · SLiMS

AI & Vision
CNN · MobileNetV2 · VGG16 · YOLO · Google Colab

Tools
Git/GitHub · VS Code · Figma · Unity · Blender

SOFT SKILLS

Communication with clients
Teamwork
Problem solving
Willingness to learn

LANGUAGES

Indonesian
English

Syafira Salsabila *Al Bahraini*

INFORMATICS STUDENT · FULL-STACK WEB DEVELOPER

Fourth-year Informatics student at Universitas Ahmad Dahlan who enjoys building information systems and computer vision applications that solve real problems. Experienced in developing a library analytics application for a real client during my internship, and active in robotics and student organizations.

Education

Universitas Ahmad Dahlan, Yogyakarta — 2023 – Present
Bachelor of Informatics (S1 Informatika), Faculty of Industrial Technology

- Thesis (in progress): YOLO11 for real-time Oracle Bone Script character detection on an ABU Robocon 2026 robot.

Internship Experience

Application Developer Intern — libnis — This semester (2026)
Library of Madrasah Mu'allimaat Muhammadiyah Yogyakarta · lecturer's community service program

- Built a library analytics desktop application with FastAPI (backend) and Electron + React (interface).
- Developed borrowing statistics to show the most popular books, book stock monitoring, and tracking of borrowed and returned books.
- Created visitor information to identify the most active student readers for the library's reward program.
- Developing real-time synchronization with the library's existing SLiMS system (data is currently entered manually).

Organization & Experience

Robotic Development Community (RDC) UAD — Member

- Team member of PPK Ormawa RDC UAD (NAWASENA smart farming program, Karangtengah, Bantul); helped prepare the SENAGARDA patent documents and the program's pre/post-test instrument.

Teaching Assistant — C++ Data Structures Practicum

- Prepared lab code, quizzes, and post-tests on single and circular linked lists.

Himpunan Mahasiswa Informatika (HMIF) UAD — Member

Selected Projects

SENAGARDA
Smart agriculture pest-control robotics system with variable-frequency ultrasonic repeller

Segara Adventure
Tourism website with WhatsApp booking · Next.js, Tailwind CSS

BelajAR
AR flashcard app for early childhood learning · Unity, Vuforia

Computer Vision Projects
Fruit ripeness, fish freshness, pneumonia X-ray, face recognition

Differential-Drive Robot
ESP32 + BNO055 IMU with PID straight-line control

Achievements

- Competed in Mathematics Olympiads (OSN) at district and provincial levels.
